

## Be a plant investigator

Can you name the parts of a plant?

root

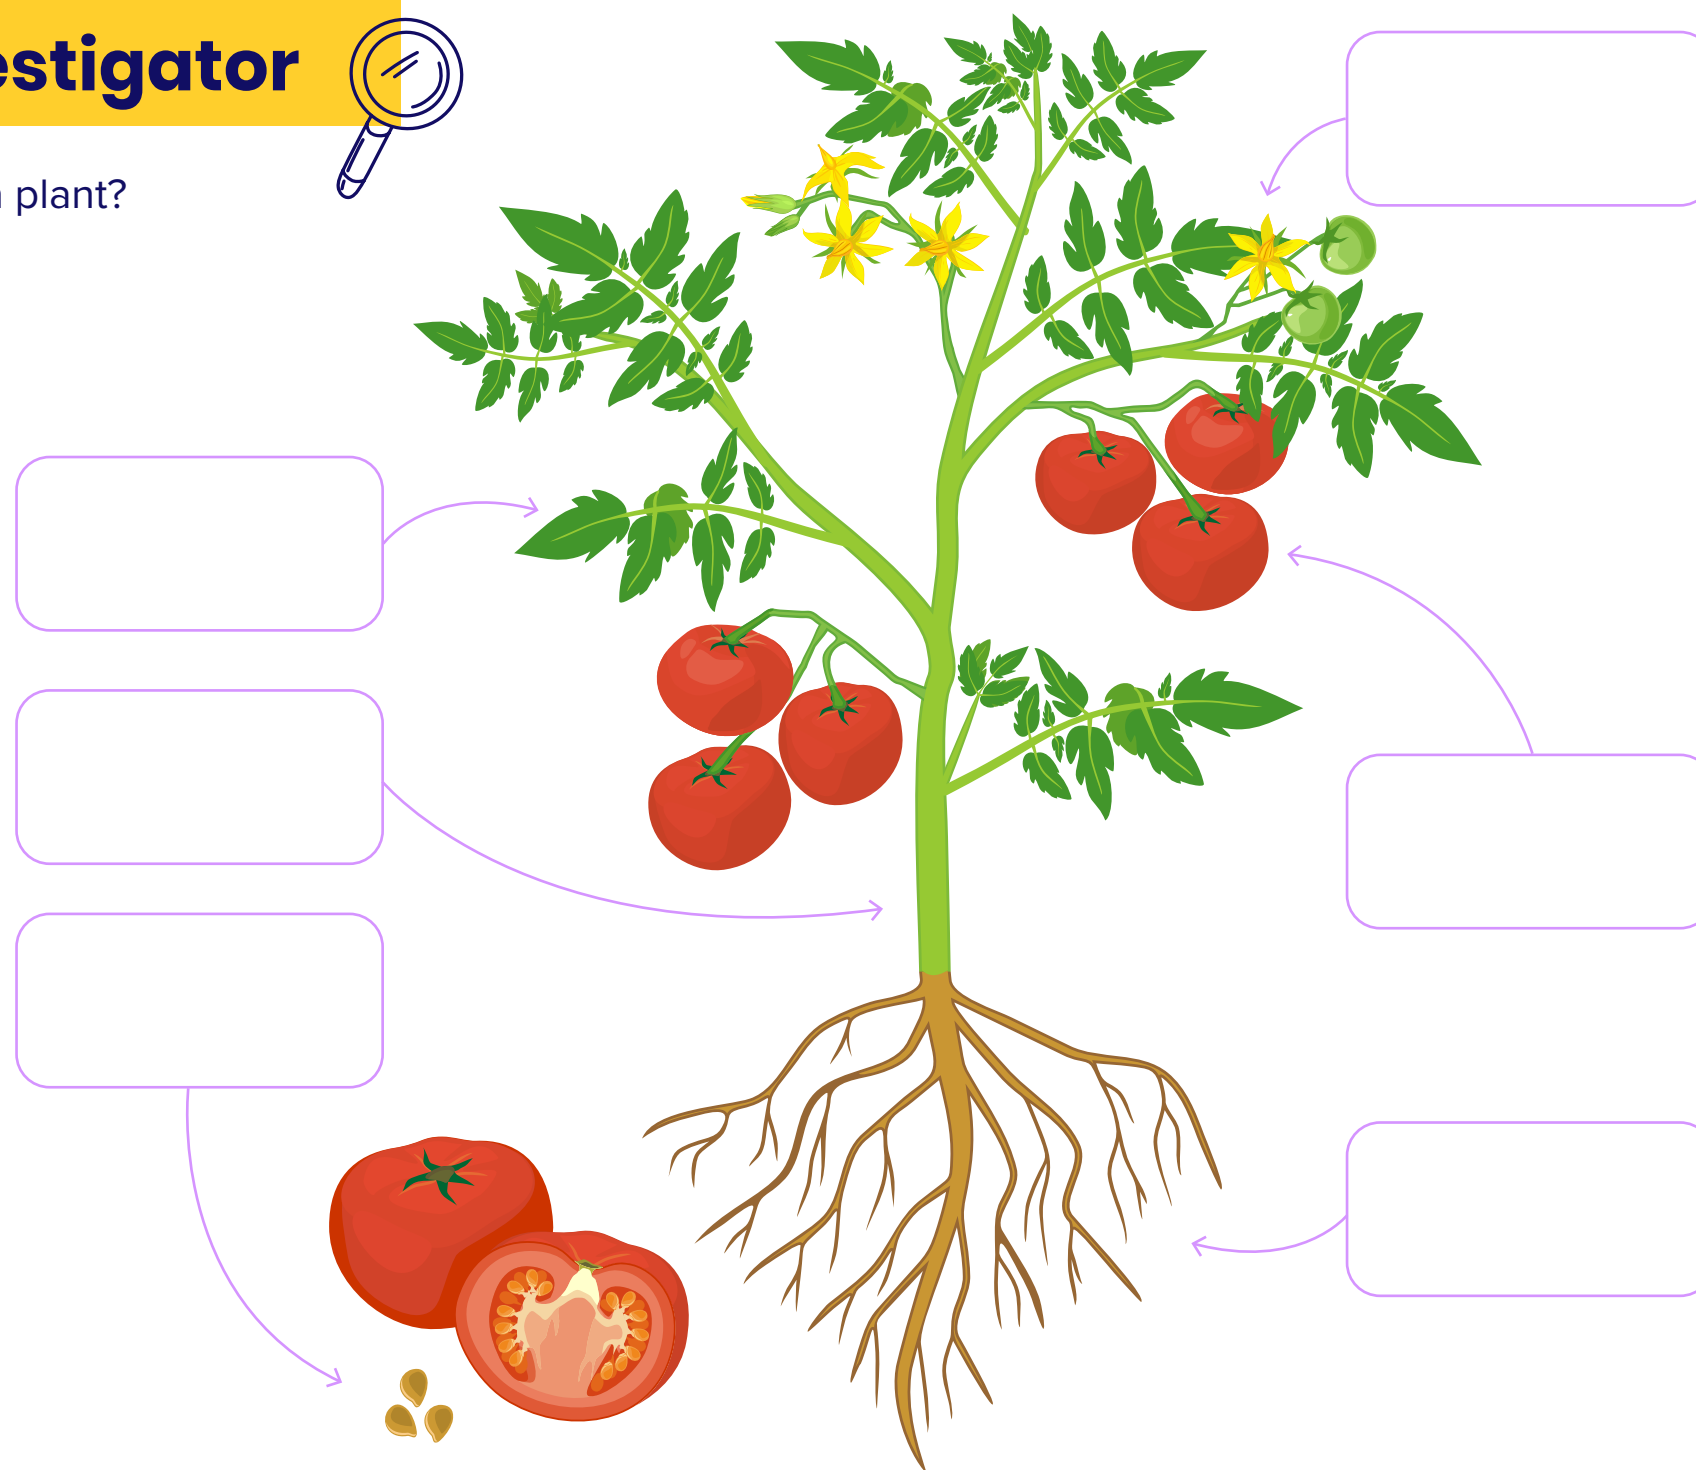

flower

fruit

stem

leaf

seed

### Remember:

Plants come in lots of different shapes and sizes and not all of them have the same parts.

Each part of the plant does something different. Can you match the plant part to its function?

This is where the plant makes its food

- This part has petals
- Seeds are made here

This part holds the leaves and flowers above the ground

This part takes up water and holds the plant in the soil

This part is fleshy and grows around the seeds

This part grows into a new plant

## Be a plant investigator

This is a tomato plant.

### leaf

This is where the plant makes its food

### stem

This part holds the leaves and flowers above the ground

### seed

This part grows into a new plant

### flower

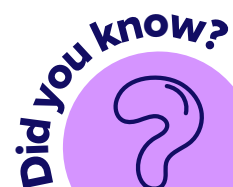

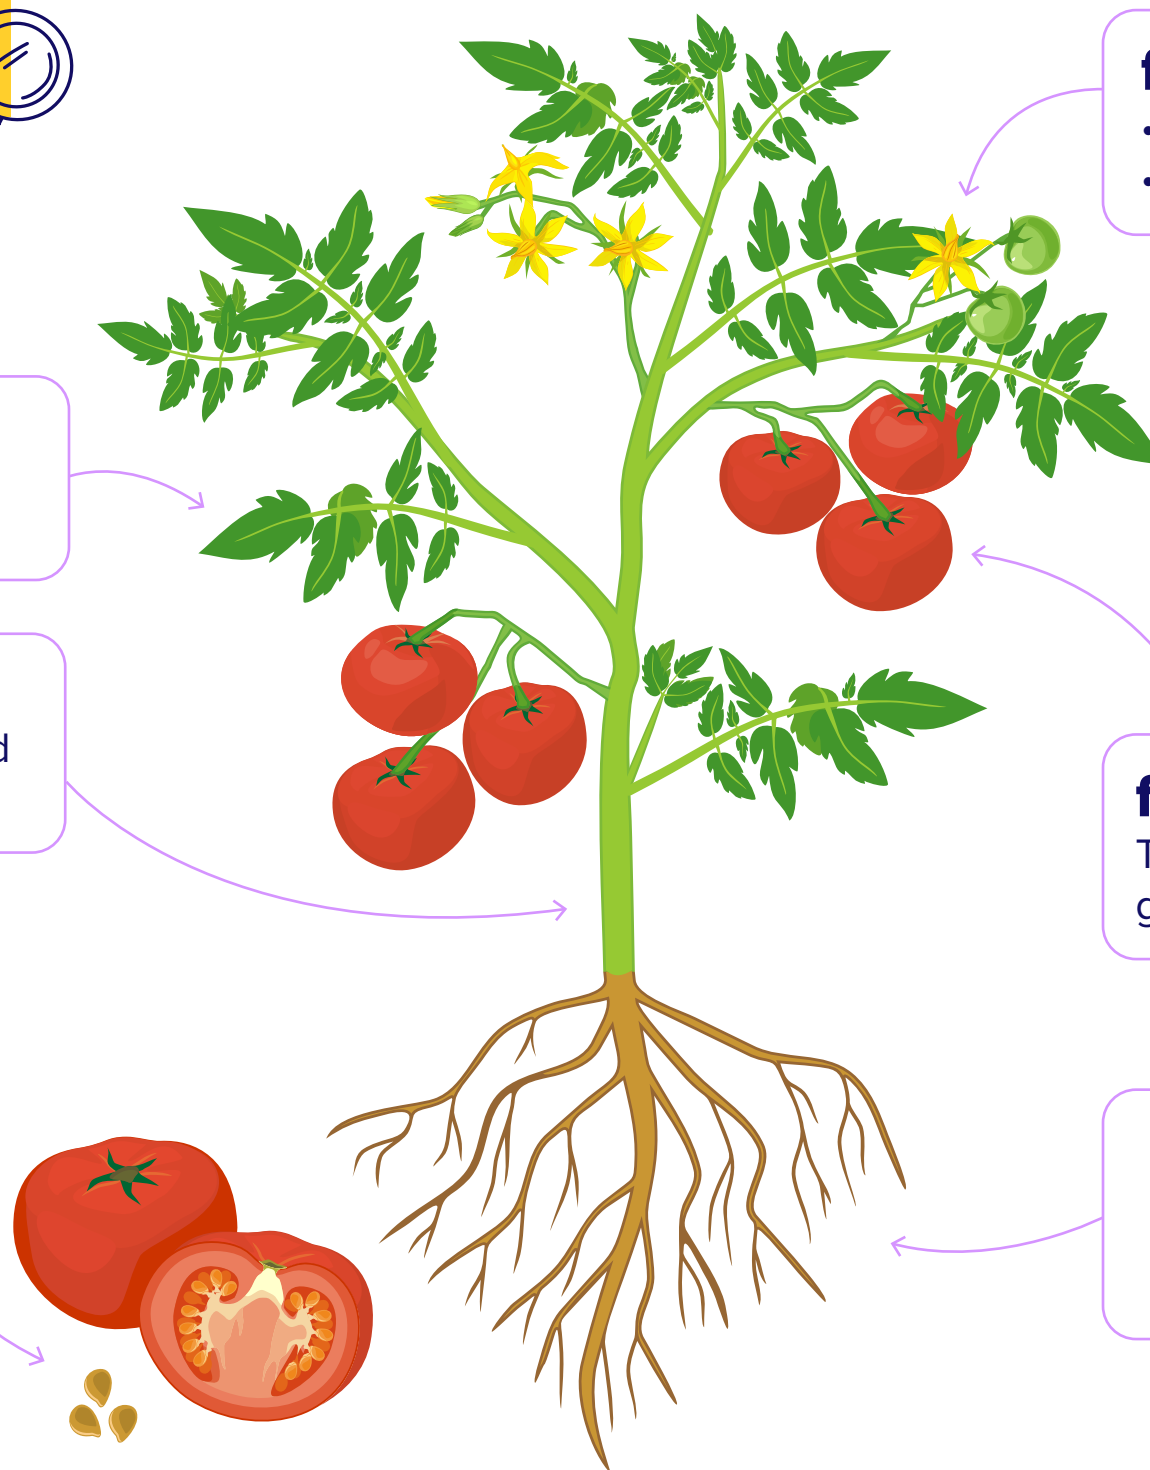

- This part has petals
- Seeds are made here

### fruit

This part is fleshy and grows around the seeds

### root

This part takes up water and holds the plant in the soil

### Trees are plants too!

Go outside and find a tree.  
Draw the tree and label its parts.

You might need some of these extra words:

trunk

bark

bud

blossom

branch

twig
